EXAMINER

GONZALEZ, JULIO C

ART UNIT

PAPER NUMBER

2834

DATE MAILED: 08/20/2002

Please find below and/or attached an Office communication concerning this application or proceeding.

# Office Action Summary

## Application No.

09/601,937

## Applicant(s)

LEE, I SOO

## Examiner

Julio C. Gonzalez

## Art Unit

2834

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 13 May 2002.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

- 4) ☒ Claim(s) 1-10 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 5, 6, 9 and 10 is/are allowed.
- 6) ☒ Claim(s) 1, 2 and 8 is/are rejected.
- 7) ☒ Claim(s) 3, 4 and 7 is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

## Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 10 August 2000 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on \_\_\_\_\_ is: a) ☐ approved b) ☐ disapproved by the Examiner.  
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

## Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).  
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

## Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) \_\_\_\_\_
- 4) ☐ Interview Summary (PTO-413) Paper No(s). \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_

DETAILED ACTION

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 2 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee (Patent # 4,882,524) in view of Hermann (Patent # 3,610,978) and Sebastian et al (Patent # 5,982,067).

Lee discloses a constant power brushless DC motor comprising a stator 4 having multi-phases, each of the winding coils of the stator which are not connected with one another is connected to each H-bridge rectifier; a rotor 7 having predetermined number of polarities, which is required to concentrate magnetic flux on excitation area; a commutation encoder (see figure 1) including sensing regions and nonsensing regions (column 8, line 60-65), the commutation encoder being externally set to one side of the shaft 11 of the rotor; and two photo sensors (column 2, line 2) set to each phase, the two photo sensors being connected to half H-bridge of each phase, to turn on/off the half H-bridge, the distance between the sensing regions of the commutator encoder is determined to allow a

Art Unit: 2834

phases among n phases to be excited all the time, the a photo sensors recognizing the a phases excited (column 6, lines 8-15). Moreover, Lee discloses the distance between the sensing regions (column 4, lines 27-34), the number of sensing regions in the commutation encoder (column 4, lines 20-22) and the distance between the photo sensors on a sensor plate (column 5, lines 41-45). Also, Lee discloses that the number of phases inexcited can be more than one (column 5, lines 59-64).

However, Lee does not disclose making narrow slots for dealing with flux cancel phenomenon.

On the other hand, Hermann discloses for the purpose of reducing eddy current losses, a motor with narrow slots or closed slots may be used to suppress harmonics of flux density (column 1, lines 60-64). Moreover, Hermann discloses that the motor is able to produce a constant power (torque) (column 1, lines 11, 12, 17, 18 & figure 1 & column 3, lines 12, 13).

However, neither Lee nor Hermann disclose explicitly coils connected in parallel.

On the other hand, Sebastian et al discloses explicitly coils of a brushless DC motor connected in parallel (see figure 5) for the purpose of obtaining high current and low voltage (column 4, lines 5-7).

It would have been obvious to one having ordinary skill in the art to design a brushless DC motor with multi phases as disclose by Lee and reduce the slots for the purpose of reducing eddy current losses as disclosed by Hermann and to have coils wound in parallel for the purpose of obtaining high current and low voltage as disclose by Sebastian et al.

***Response to Arguments***

3. Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.

4. Applicant's arguments filed 05/13/02 have been fully considered but they are not persuasive.

Lee (Patent # 4,882,524) discloses a brushless DC motor (see title) with a constant excitation winding phase which could lead to a constant output power (column 3, lines 34-37). Moreover, the windings are disclosed to be independently connected of other phases (column 3, lines 22-28) and even the applicant's own invention shows in figure 1 the windings connected to each other, which does not make them "independently".

Also, the prior art shows each phase of the stator is connected in parallel (column 2, lines 16-18 & column 7, lines 14-17) and the phases can be excited or inexcited since the commutator can turn on and off the transistors thus cutting off the current to the phases which would make the phases been excited or inexcited (column 6, lines 8-15, column 7, lines 25-34).

***Allowable Subject Matter***

5. Claims 5, 6, 9 and 10 are allowed.
6. Claims 3, 4 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Julio C. Gonzalez whose telephone number is (703) 305-1563. The examiner can normally be reached on M-F (8AM-5PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nestor Ramirez can be reached on (703) 308-1371.

Application/Control Number: 09/601,937
